## Tails of the Town

Hello All,

After the **Share the Care** announcement in the January newsletter, several of you rounded up your unnecessary items for me to rehome. In the first quarter of this year, I received beds, blankets, cat trees, food, feeding dishes, scratchers, and bags of toys for deserving pets. I'm a grateful pet sitter.

Thanks so much for the generous donations!

After sending the January newsletters, a few bounced due to inaccurate email addresses. I have updated those, but if you did not receive that issue, you can view them on my website [FernandinaPetSitting.com](http://FernandinaPetSitting.com).

## UPDATES & REMINDERS

- May is my second busiest month of the year, behind December. If you have travel plans, check with me soon; some dates are full. June and July are filling up.
  - Hurricane season runs June 1- Nov 31. If you plan to travel during this time (beyond a day's drive), I need local emergency contacts. If your local contacts need to be added or updated, please get those to me soon. Name, address, phone number, and relation of those that can help with your pet (if needed) in case of a hurricane threat. [The Shave bridge closes with sustained winds greater than 39 mph.](#) [Planning is essential.](#)

## Favorite Products

[BANIXX](#) is one of my favorite pet products. I keep a bottle on hand for home use and recommend it for other pets at times. Here's why...

- Especially effective at combatting dog and cat ear infections and provides immediate recovery of hot spots, yeast infections, ringworm, cuts, scratches, dry, itchy skin, rashes and wounds.
- Made without using steroids, alcohol, or fragrances.
- Sting-free and odor-free relief.
- Clinically proven safe around the eye, nose & mouth.

- Made in the USA.

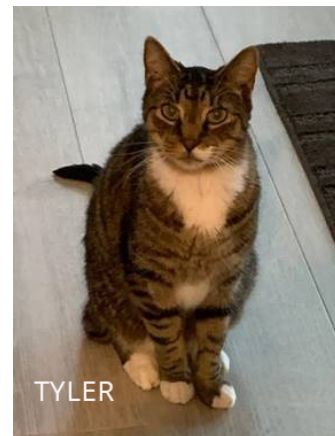

We rescued three very sick kittens about 2 1/2 years ago. They all had lots of problems, with one being ringworm. The vet treated them with an oral anti-fungal, which is quite harsh on the system, especially 4-month-old sick kittens. It wasn't pleasant for any of us, and worse, it wasn't going away even though we did everything needed to get rid of it. I found out about Banixx and decided to try it. With only a few treatments, I was surprised and relieved by the clear improvement. It is my go-to product for anything it's made to treat because it works! Great for cats, dogs, horses, and probably a few other animals.

You can read the stories about other believers and see before and after photos [here... www.banixx.com](http://www.banixx.com).

Until one has loved,  
an animal, a part of one's  
soul remains unawakened.

~ Anatole France

Keeping in our hearts pets lost since January 2023.

---

**This is Hank.** He's almost 7 years old, weighs about 25 lbs, has one eye, and is another one of my special needs pets. An exceptional couple adopted Hank from the Rescue Ranch in Georgia. He was born with cerebellar hypoplasia and cannot walk. He also has daily episodes similar to seizures. When his family first adopted him, he had 30 - 40 episodes a day, but with their excellent care, he's down to only 1-2 a day. Despite Hank's limitations, he's a sweet special doggie that likes to play a little rough and get warm baths. I see Hank along with his pet brothers and sisters 4 times a day when his family travels.

It takes extraordinary people (Loretta & Joe) to take on a pet like Hank. He's a lucky dog!

---

Thank you for your trust.

Renee Martin
